

## COQ10 PLUS

CoQ10 is found in every cell throughout the body and especially abundant in the heart muscle. It is essential in the production of energy on the cellular level. After the age of 20, CoQ10 production in the body starts to decline. Other lifestyle factors can cause further depletion. CoQ10 deficiency can cause a lack of vitality and poor health and many heart failure cases are found to be linked with low CoQ10 levels in the heart muscle. Deficiencies of coenzyme Q10 have been linked to periodontal disease, diabetes and muscular dystrophy.

Through extensive research, NewLife™ International has developed an advanced formula of CoQ10 that is combined with flaxseed extract to enhance bioavailability and absorption into the blood stream.

### BENEFITS

- Supports heart health
- Increases energy levels
- Maintains healthy blood pressure and cholesterol levels
- Oxygenates cells
- Improves alertness and alleviates tiredness
- Strengthens the immune system
- Helpful in fighting obesity, candidiasis, multiple sclerosis, diabetes, allergies, asthma, respiratory disease, schizophrenia and Alzheimer's disease
- Has been shown to be effective in reducing mortality in experimental animals afflicted with tumours and leukaemia
- Protects the stomach lining and duodenum
- A powerful antioxidant that has anti-ageing effects

### KEY FEATURES

- Nature's Gift CoQ10 Plus from NewLife™ comes in veggie caps – ideal for vegetarians.
- It is oil soluble, the same form as found naturally in our body and is the only form that the body would use, unlike water soluble CoQ10, a processed reduced form which is not natural to the body and which the body will not use.
- It is specially blended with essential fatty acids from flax seed concentrate, which provides a special “transport system” to enhance the bioavailability of CoQ10.
