

COLOSTRUM X

Colostrum is the pre-milk fluid secreted by mammalian mothers in the first days after giving birth. It contains essential nutrients, growth factors and immune factors that help to protect newborns against infection. Taken as a daily supplement, ColostrumX can boost the immune system and help the body to burn fat and build lean muscle. It may also accelerate the recovery of injuries, increase vitality and stamina, and have an anti-ageing effect.

| BENEFITS

NewLife™ Colostrum X

- Contains an abundance of Immunoglobulin G (IgG) and over 95 immune factors and antibodies that protect the body against toxins and pathogens.
- Contains DHA/EPA that maintains healthy retina and brain function. These essential fatty acids help to promote healthy cardiovascular system and are essential for growth and intellectual development.
- Contains Phytic Acid, which is a powerful antioxidant.
- Contains Proline-rich Polypeptide (PRP), a hormone that helps regulate the thymus gland, stimulating an under or overactive immune system.
- Contains lactoferrin, an iron binding protein with therapeutic effects for HIV, candida albicans, herpes and other infections.
- Contains human growth factors that stimulate growth and development of cells and tissues.
- Contains epithelial and fibroblast growth factors that enhance the regeneration and repair of cells and tissues such as bones, muscles and blood vessels.
- Contains metabolic factors that influence the restoration and maintenance of proper metabolic levels.
