

EXTRA VIRGIN COCONUT OIL

Coconut Oil is comprised predominantly of medium chain fatty acids (MCFA) that possesses unique properties with important nutritional and medical applications. It is high in antioxidants that combat the effects of ageing and helps to rejuvenate and soothe the skin.

Regular intake of Coconut Oil has been proven to strengthen the immune system, stimulate metabolism and prevent bacterial and viral infections.

BENEFITS

NewLife™ Extra Virgin Coconut Oil:

- Strengthens the immune system
- Is an excellent anti-ageing ingredient
- Promotes healthy thyroid function
- Protects against heart diseases and other serious health problems
- Boosts energy and metabolism
- Promotes healthy skin and hair
- Promotes weight loss
- Prevents bacterial, viral and fungal infections

KEY FEATURES

NewLife™ Organic Extra Virgin Coconut Oil is cold pressed and naturally extracted from freshly selected organically harvested coconuts. It is developed under conditions set out by internationally accepted food and quality standards. This ensures that it is bottled with all its natural goodness and without traces of preservatives, additives or chemical solvents.
