

AQUANATURE –

FOR SKIN THAT NEEDS
EXTRA MOISTURE

焕颜保湿系列 –
适用于极需特加保湿的肌肤

There are many factors that can cause our skin to become unhealthy, such as pollution, stress, poor diet, etc. But one of the most common factors that can cause poor skin health is dehydration. When we are not drinking enough water, the skin can become dehydrated and dry, which makes it more prone to the wrinkling, flaking, itchiness, and more.

As we age, especially after the age of 30, our skin cells begin to lose their capacity to store moisture. As a result, even when we drink sufficient water, our skin may not be as hydrated and supple as it used to be. Therefore, it becomes increasingly important to top up the skin's moisture levels. Only well-hydrated skin can protect itself against wrinkles and retain its elasticity for longer.

许多因素都可能影响肌肤变得不健康，如污染、压力、饮食不均衡等。不过，导致皮肤健康不佳的最常见因素之一就是缺水的问题。当我们饮水不足时，皮肤就会变得干燥，结果容易形成皱纹、出现脱皮、瘙痒及其他问题。

随着年龄的增长，特别是在30岁以后，皮肤细胞的保湿功能就会开始下降。即使摄取足够的水分，肌肤也不再像之前般的水嫩柔滑。因此，做好补水工作提升肌肤湿度是非常重要的。想要有美肌就一定不能忽视了保湿动作，这样才可预防皱纹的形成，并延长维持皮肤弹性。

SPECIAL PROMOTION 特别促销

Purchase any one product from the AQUANATURE SERIES and enjoy 30% DISCOUNT on:
